

Dear Senator/Representative \_\_\_\_\_,

We continue to appreciate the bipartisan commitment to Head Start. As you know, Head Start gets our most at-risk children ready for kindergarten so that they can be successful in school and in life. Studies continue to find that for every \$1 invested in a program like Head Start, taxpayers will save upwards of \$7. Here in Washington we serve less than 43% of eligible children in Head Start, and less than 5% in Early Head Start due to a lack of funding. We ask that when you look to finalize the budget for fiscal year 2015 that you support an increase in new funding for Head Start so we can expand and serve more children.

Sincerely, \_\_\_\_\_
